

BAR HANDLING & ROBOTICS

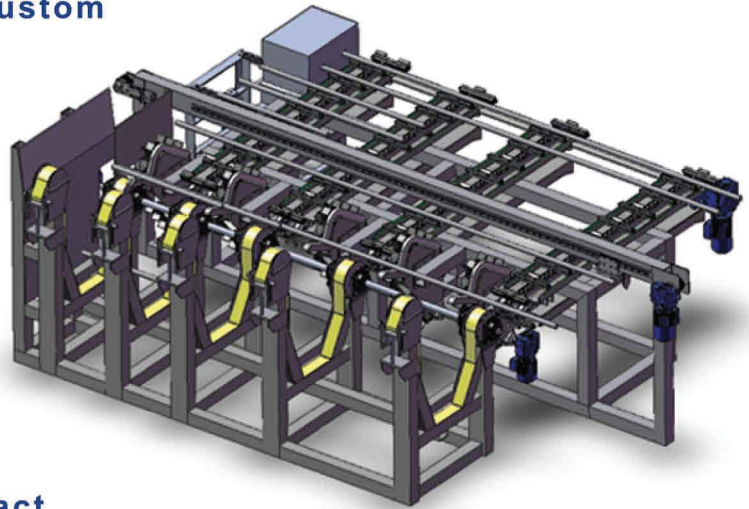

Australis Engineering can provide a range of Bar Handling equipment designed for custom applications. Systems can include:

- Automated handling
- Bar unscrambling
- Bar singlising
- Strapping and bundling systems
- Quench systems
- Gripping and placement systems

From single conveyors to complete automated systems, relocations to installations, retrofitting to refurbishing - we can meet your exact needs to your exact specifications.

ROBOTIC SYSTEM DESIGN:

Custom designed grippers & actuators
Infeed & Outfeed conveyors
Proudly installing Kuka, Reis & ABB

COMPANY NEWS:

Australis Engineering has begun installation of world's largest largest 6-Axis robot, the Kuka Titan KR1000 as part of the Royal Australian Mint Materials Handling System upgrade. This is the first Titan in Australia and will be a flagship installation for KUKA.
